

General informations

Year of production: 2017

Length: 11,75 meter

Width: 3,50 meter

Immersion: 0,50 meter

Motor: 2 x 25 KMFT YAMAHA

Water container: 250 liter

Sewage container: 70 liter

Fuel tank – 500 liter

Loads: 9800 kilogram

Raw material: Steel: STRENX 700MC, Inox; laminate, exotic wood

Equipment

1. Heating: Webasto, boiler for hot water
2. Refrigerator
3. Gas cooker (double burner) + sink
4. Bathroom: marine toilet, washbasin, shower
5. Wardrobe for clothes
6. 2 sofas + corner sofa
7. Decks: sun decks, stern deck, fore deck
8. Color TV, radio
9. Monitoring – 3 cameras

Technical equipment

1. 4 batteries – 400 Ah
2. Battery for motors
3. Land terminal
4. Photovoltaic panels with MPPT regulator
5. Toroidal transformer with rectifier
6. Electrical system – 12V and 230V
7. Generator – 4,5 KVA (inverter)
8. Fuel gauge, oil level gauge, water level indicator, faeces level indicator
9. LED lighting (outside and inside)
10. Headlights, rear lights
11. Hydraulic rudder
12. Fore water ruder

Houseboat is a combination of a motor yacht and a house on the water. Due to the large amount of space provides comfortable conditions for rest and travel. The Unit is registered for 12 people by the Polish Register of Shipping S.A. and has CE marking. Displacement is 16 tons and immersion of 50 centimeters which allows for sailing on all waters and to pull in to shore. Houseboat is made up of

three outriggers ensuring high stability of the Unit. Each outrigger has three sealed chambers. All decks are made of exotic wood. The railings on the upper deck are collapsible for easy transport and sailing under low obstacles.
